

SERVICES AVAILABLE

BROADBAND DATA CONNECTIONS

Choose the internet bandwidth that fits your company's needs. We have speeds for the small business with light internet use or for larger enterprises that engage in large-scale business processes such as internal and external file sharing, streaming video, & e-commerce.

ETHERNET DATA CONNECTIONS

Link multiple locations. Leverage bandwidth-intensive applications. Fortify your business continuity plans. Customized network solutions can cost-effectively power your Wide Area Network infrastructure for seamless and secure collaboration. Empower your IT staff with network visibility via a secure Ethernet Portal providing real-time status and reporting capabilities

CLOUD DISASTER STORAGE

Business Continuity and Disaster Recovery have been part of business vernacular for years, but with fairly narrow definitions. Alliance Telecom Corp however, has taken a broader, and what we believe is a more strategic view, of both these terms.

HOSTED IP-PBX SYSTEMS

Our reliable VoIP business phone system helps savvy companies like yours generate new levels of efficiency. You get 40+ business-class features – including mobile apps – and you'll save 20% PLUS with no contracts.* Getting started is easy.

ATC TECHNOLOGY SOLUTIONS BENEFITS

- **Service Level Agreement:**

Ethernet Services are highly secure and reliable, backed by stringent Service Level Agreements (SLAs) and 24/7/365 monitoring

- **Privacy:**

Sensitive data is transferred over a dedicated, high-capacity, point-to-point connection at native

- **Ethernet Speeds:**

symmetrical 5Mbps, 10Mbps, 20Mbps, 50Mbps, 100Mbps, 500Mbps, 1Gbps ...

- **Single Interconnection:**

A hub aggregates all data traffic on a single network among all your business locations

- **Cost savings:**

EPL allows you to connect your business's Customer Premises Equipment (CPE) with a lower-cost

- **Ethernet interface:**

EVPL and ELAN offer a single handoff, reducing network equipment and management costs

- **Security:**

Inherently secure networking environment over a dedicated MEF CE 2.0 certified infrastructure

- **Traffic Separation:**

Maintain separate traffic when you consolidate previously separate domains for specific applications or departments onto a single network
